ELSEVIER

European Journal of Operational Research 80 (1994) 703–705

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 79

1 Editorial
2 Corporate environmental and resource management: In search of a new managerial paradigm
J.P. Ulhøi
16 A location–distribution application for a beer company
M. Köksalan, H. Süral and Ö. Kırca
25 OR in practice: Results of a survey in the United Arab Emirates
B.J. Kemp and D.A. Yousef
34 Financial ratio distribution irregularities: Implications for ratio classification
T. Martikainen, J. Perttunen, P. Yli-Olli and A. Gunasekaran
45 Air traffic management: High–low traffic intensity analysis
E.E. Velazco
59 Evaluating sampling strategy under two criteria
B. Ronen and Y. Spector
68 An analytical model for the container loading problem
C.S. Chen, S.M. Lee and Q.S. Shen
77 Competitive location with rectilinear distances
R. Infante-Macias and J. Muñoz-Perez
86 Inverse inconsistency in analytic hierarchies
F.J. Dodd, H.A. Donegan and T.B.M. McMaster
94 Semi-active, active, and non-delay schedules for the resource-constrained project scheduling problem
A. Sprecher, R. Kolisch and A. Drexl
103 Weighted flow time bounds for scheduling identical processors
S. Webster
112 Global lower bounds for flow shops with multiple processors
D.L. Santos, J.L. Hunsucker and D.E. Deal
121 Nesting planning based on production priorities and technological efficiency
O. Maimon and A. Dayagi
130 Decision support system for the composition of the examination problem
I. Miyaji, Y. Nakagawa and K. Ohno
139 A polynomial-time algorithm for message routing in hierarchical communication networks
G.G. Polak and R.K. Ahuja
147 A submodular approach to discrete dynamic programming
C.M. Klein
156 An algorithm for generating efficient solutions of multiobjective dynamic programming problems
M.A. Abo-Sinna and M.L. Hussein
166 A discretizing algorithm for location problems
E.J. Carrizosa and J. Puerto
175 Search–hide games on trees
B. Cao
184 Solving a class of LP problems with a primal–dual logarithmic barrier method
J. Gondzio and M. Makowski
193 Use of reference points for solving MONLP problems
B. Metev
204 A representation of an efficiency equivalent polyhedron for the objective set of a multiple objective linear program
R.J. Gallagher and O.A. Saleh

213 A linear approximation method for solving a special class of the chance constrained programming problem
Y. Zare M. and A. Daneshmand
226 A parametric maximum flow algorithm for bipartite graphs with applications
Y.L. Chen
236 OR Software
ORSEP – Operations Research Software Exchange Program, *H.W. Hamacher (ed.)*, Codes of geometrical algorithms for the (Weighted) Minimum Circle Problem, *D.W. Hearn and J. Vijay; S. Nickel*

Feature Issue on Integrating Production Lotsizing, Inspection, and Rework Decisions

239 Editorial
G.K. Tayi
240 Quality defaults and work-in-process inventory
C. Cordon
252 Optimal recovery strategies for manufacturing systems
J.-F. Kao
264 Production to order on a two machine line with random yields and rigid demand
A. Grosfeld-Nir and L.W. Robinson
277 Specialized inspection problems in serial production systems
R. Rebello, A. Agnetis and P.B. Mirchandani
297 Single bottleneck systems with proportional expected yields and rigid demand
A. Grosfeld-Nir
308 The impact of defects on a process with rework
S.R. Agnihothri and R.S. Kenett
328 Economic purchasing strategies for temporary price discounts
R.J. Tersine and S. Barman
344 Processing networks with planned inventories: Tandem queues with feedback
P. Zipkin

350 The development of a rule based expert system model for fraud alert in consumer credit
K.J. Leonard
357 The effect of axis rotation on distance estimation
J. Brimberg, R.F. Love and J.H. Walker
365 Using degree of consensus in two-level fuzzy pattern recognition
L.I. Kuncheva
371 Analysis of approximation algorithms for single-machine scheduling with delivery times and sequence independent batch setup times
S. Zdrzałka
381 Scheduling to minimize the total resource consumption with a constraint on the sum of completion times
C.-L. Li
389 An application of genetic algorithms for flow shop problems
C.-L. Chen, V.S. Vempati and N. Aljaber
397 Heuristics for scheduling a single machine subject to unequal job release times
C. Reeves
404 Bicriterion Stochastic Scheduling on one or more machines
F.G. Forst
410 Using AHP for resource allocation problems
R. Ramanathan and L.S. Ganesh
418 Some concave-convex representations of the quadratic assignment problem
D.J. White
425 Symmetric duality for minimax nonlinear mixed integer programming
V. Kumar, I. Husain and S. Chandra
431 An algorithm to determine boundedness of quadratically constrained convex quadratic programmes
R.J. Caron and W.T. Obuchowska
439 A theorem on nonconvex functions and its application to vector optimization
I. Kaliszewski
446 The canonical order and greedy algorithms
M.M. Kovalev and D.M. Vasilkov

Special Issue on Productivity Analysis: Parametric and Non-Parametric Applications

451 Editorial
452 Econometric efficiency analysis: A policy-oriented review
C.A.K. Lovell
462 Components of efficiency evaluation in data envelopment analysis
A.I. Ali, C.S. Lerme and L.M. Seiford
474 Non-parametric efficiency, progress and regress measures for panel data: Methodological aspects
H. Tulkens and P. Vanden Eeckaut
500 Decomposing efficiency into its managerial and its regulatory components: The case of European railways
H.-J. Gathon and P. Pestieau
508 Airline efficiency differences between Europe and the US: Implications for the pace of EC integration and domestic regulation
D.H. Good, L.-H. Röller and R.C. Sickles
519 Efficiency of the Swedish pork industry: A farm level study using rotating panel data 1976–1988
A. Heshmati, S.C. Kumbhakar and L. Hjalmarsson
534 Stochastic production frontiers and panel data: A latent variable framework
M. Ivaldi, S. Monier-Dilhan and M. Simioni
548 Evaluating physician efficiency in hospitals: A multivariate analysis of best practices
J.A. Chilingerian
575 Estimating output substitutability of hospital services: A distance function approach
S. Grosskopf, D. Margaritis and V. Valdmanis
588 Exploring output quality targets in the provision of perinatal care in England using data envelopment analysis
E. Thanassoulis, A. Boussofiane and R.G. Dyson
608 On the relative efficiency of alternative modes of producing a public sector output: The case of the developmentally disabled
R. Dusansky and P.W. Wilson
619 Strategic leaders or strategic groups: A longitudinal Data Envelopment Analysis of the U.S. brewing industry
D.L. Day, A.Y. Lewin and H. Li
639 The technical efficiency of vacuum-pan sugar industry of India: An application of a stochastic frontier production function using panel data
M.J. Ferrantino and G.D. Ferrier
654 Cost efficiency in the US steel industry: A nonparametric analysis using data envelopment analysis
S.C. Ray and H.J. Kim
672 Regional concentration and efficiency in Mexican manufacturing
G.J. Bannister and C. Stolp
691 Measuring technical progress with data envelopment analysis
Q.L. Wei, B. Sun and Z.J. Xiao
703 Contents Volume 80
